

Birmingham Office Release

Sky High are pleased to announce the opening of their 7th UK office, based at Colmore Plaza in a stunning 14-storey, new landmark building located in the prime business district of the City of Birmingham.

The Birmingham office is the latest addition to Sky High Plc's growing UK presence, with offices already situated in Glasgow, Edinburgh, Cardiff, London, Halifax and Leeds.

Recently appointed Commercial Manager, Peter Agnew will be running operations for the Birmingham office and explains: "I have worked in the data collection industry for a number of years, working with various clients in both the public and private sector. In my experience it is rare to come across a company as focused as Sky High in delivering the highest quality service and achieving superior customer satisfaction."

Founded in 1989, Sky High is a pioneer in the development and deployment of innovative data capture systems. It has become one of the fastest growing suppliers of traffic survey and data collection services in the UK.

Sky High now has three separate operational divisions: Sky High Road Safety Audits, Sky High Traffic and Sky High Data Capture; all working with the combined goal of providing its clients with a comprehensive and proficient service.

According to Mark Mattison, Managing Director of Sky High, "An integral part of our success has been our ability to develop long lasting, strategic relationships with our clients. The new Birmingham office will add to Sky High's existing commitment to bring our clients the best service possible. "Our clients recognise the benefits of working with a unique multi-faceted organisation such as Sky High. We are committed to ensuring that our clients demands are met and will continue to expand our team and site locations to maintain the high service levels our clients have now come to expect".
