

## **Sky High Plc ("Sky High" or the "Company")**

### **Trading Update**

In January, Sky High experienced a decline in sales enquiries and orders in the UK Traffic Survey business. Although enquiries and orders in the Traffic Survey business have in February returned to the same levels experienced in previous years and are currently in line with expectations, the decline in January has adversely affected trading in the final quarter of the current financial year.

As a result of these fluctuations, the directors have placed some of the Company's employees on a reduced working week on a temporary basis, to give the Company flexibility in managing its fixed cost base until they are confident that enquiries and orders in the UK Traffic Survey business have normalised.

Halifax Computer Services Limited (trading as Sky High Data Capture) and Sky High Australia Pty continue to trade well.

The Company continues to be cash positive and has strong working capital.
